

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS.

MONTHLY BULLETIN OF EMPLOYMENT STATISTICS.

JANUARY, 1946.

Issued for General Information

EVENING PAPERS .. MONDAY, 8TH APRIL, 1946.

MORNING PAPERS .. TUESDAY, 9TH APRIL, 1946.

P A R T I

TOTAL PERSONS OCCUPIED, JULY 1939, JUNE 1943 AND 1ST JUNE 1945.

Statistics relating to the numbers of persons occupied as Employers and Self-Employers Not Employing Other Labour are available only from a Census, or quasi-Census such as the National Register, 1939, Civilian Registration 1943 and Occupation Survey 1945.

Preliminary totals for males derived from the Occupation Survey of 1st June, 1945 are given below in comparison with figures for July 1939 and June 1943.

TABLE 1. AUSTRALIA - OCCUPIED MALES.

(Thousands)

Grade	July 1939	June 1943	1st June 1945 (a)
Employers, Self-Employers (b) ..	599.0	407.0	474.9
Wage and Salary Earners ..	1,495.1	1,399.1	1,424.1
Unemployed (all causes including sickness) (c) ..	264.0	19.5	39.9
<u>Total Civilian Breadwinners:</u>	2,358.1	1,825.6	1,938.9
Net Total Occupied Civilians ..	2,094.1	1,806.1	1,899.0
Defence Forces, Net Enlistments (d)	12.9	685.0	603.5
<u>Total Occupied Males:</u>	2,107.0	2,491.1	2,502.5

(a) Preliminary figures. Subject to revision. (b) Including unpaid relatives assisting on rural holdings. (c) The numbers shown as unemployed include all who so describe themselves and may include some voluntarily idle. (d) Gross enlistments less discharges and deaths.

During the first two years of the war the numbers of civilians occupied as employers and workers on their own account (i.e. self-employers) decreased rapidly due to large numbers transferring to wage and salary earning jobs and to enlistments. Absorption of unemployed, together with transfers from employer, etc. to wage-earner status and the entry into paid employment of males not normally offering for work, resulted in an increase in the numbers of civilian wage and salary earners in work, despite some 300,000 enlistments. However, when Japan entered the war in December, 1941, large-scale compulsory call-up of men for full-time service reduced the numbers of male civilian wage and salary earners.

The peak of enlistments was reached in the latter half of 1943 when limits were placed on the allotment of men to the services and a considerable number of men were restored to industry of high priority. The Civilian Registration of June 1943 showed that 1,806,100 civilian males were in work in all industries including rural. Preliminary figures from the Occupation Survey of 1st June 1945 indicate a total of 1,899,000 male civilians in work. The increase of 92,900 between these dates comprised 67,900 male employers and self-employers (relatives of farmers not working for wages being included in this category) and 25,000 male wage and salary earners. Net enlistments decreased by 81,500 (excess of deaths and discharges over new enlistments) during the period, and the net increase in total males occupied (in civil work and the Services) was 11,400.

/PART II.

SECTION A. TOTAL WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT.

Total wage and salary earners working in all industries (including rural and private domestic employment) are shown at intervals in the table below:-

TABLE 2. AUSTRALIA - WAGE AND SALARY EARNERS IN CIVIL EMPLOYMENT.
(Thousands)

Month	M a l e s			F e m a l e s				TOTAL PERSONS
	Rural Industry (a)	Other Industry	Total	Rural Industry (a)	Private Domestic	Other Industry	Total	
July, 1939	202.0	1,293.1	1,495.1	4.0	124.5	437.1	565.6	2,060.7
July, 1941	188.0	1,363.4	1,551.4	6.0	100.0	548.5	654.5	2,205.9
June, 1942	145.5	1,309.5	1,455.0	16.0	75.0	594.8	685.8	2,140.8
June, 1943	125.2	1,273.9	1,399.1	28.0	50.9	631.3	710.2	2,109.3
May, 1945(d)	129.7	1,294.4	1,424.1	(b)	(b)	633.5(c)	(b)	(b)

(a) Excluding unpaid helpers. (b) Not available. (c) Preliminary figure subject to revision on basis of results of Occupation Survey, 1st June, 1945. (d) Preliminary totals (males only) available from Occupation Survey tabulations.

Note: Complete records of employment in rural industry and in private domestic service are obtainable only at a Census or quasi-Census such as the Occupation Survey, 1st June, 1945, results of which are approaching completion.

The annual A. & P. returns collected from farmers, graziers, etc. also provide information about the trend of employment in rural industry.

The balance of Part II of this monthly Bulletin deals with figures of wage and salary earners in employment, exclusive of rural and private domestic. The figures in all cases relate to wage and salary earners in civil employment only and exclude persons engaged as employers or on their own account or serving full-time in the Army, Navy and Air Force (including Permanent Forces).

SECTION B. AUSTRALIA - WAGE AND SALARY EARNERS IN EMPLOYMENT
(EXCLUDING RURAL INDUSTRY & PRIVATE DOMESTIC SERVICE)

Estimates of the number of wage and salary earners in civil employment (excluding rural workers and female domestics in private homes) are made monthly through the use of Pay-Roll Tax statistics and direct returns of Commonwealth Government employment.

The estimates, shown in Table 3, are subject to revision in the light of results of the Occupation Survey, 1st June 1945. Preliminary totals from the Survey for males only are shown in tables 1 and 2. Revision of Tables 3, 5, 6 and 7 will not be made until complete results are available. In the meantime, current trends in employment can be gauged from Tables 3 and 5 as published below:-

(a) Includes all direct Government employment, viz., civilian employees of Commonwealth Government factories, civil and war departments and construction authorities, and of State, Semi-Government, Local Government and Allied Government Authorities.

(b) See Note (d) Table 5.

/Figures

Figures in the preceding table relate only to wage and salary earners in employment (excluding rural industry and females in private domestic service) and do not reflect the full effects of either the policy of restoring Service personnel to essential industry which was applied as from about August 1943, nor of demobilisation following the end of hostilities.

GENERAL REVIEW - TABLE 3.

MALES: The total number of male wage and salary earners in civil employment, Government and private (excluding rural industry) reached a peak in November 1941 (1,381,300) following which there was a heavy decline due to the compulsory call-up of men for the Armed Forces.

The number of male wage and salary earners in employment (excluding rural industry) reached its lowest level in the second half of 1943 and then remained fairly steady until the beginning of 1945, when a slow expansion began.

In each of the two months following the end of hostilities in August 1945, male employment (excluding rural) declined. There was some recovery in private employment during November, but this was offset by reductions in December, resulting from industrial disputes and the rationing of coal and power. In January, 1946, the number of males in private employment (excluding rural) increased by nearly 51,000 and Government employment increased by approximately 4,000 males due mainly to expansion of State Government employment.

From the end of August, 1945 (or approximately the end of hostilities) to the end of January, 1946, the estimated number of male wage and salary earners in civil employment (excluding rural industry) increased by 49,900. This resulted from demobilisation of very large numbers of Servicemen (see Part III of this Bulletin). After allowing for the temporary effects of industrial disputes and power rationing in December, 1945, it is apparent that the first large increment to the wage-earning population from the ranks of ex-Servicemen occurred in that month. The conclusion may be drawn that there is a lag of two to three months between time of discharge and time of resuming civilian work.

There are other factors influencing the trend of numbers in wage and salary earning employment -

1. The large increase (67,900) in male employers and workers on own account between June 1943 and 1st June, 1945, resulted mainly from transfers back to their former (or new) businesses and farms, of men working as wage and salary earners during the war. This movement probably is still going on.
2. A substantial increase is taking place in rural employees.
3. Persons who would not normally be breadwinners but who entered paid employment during the war, or delayed their retirement, have been leaving paid employment in fairly large numbers.

FEMALES: During the war the total number of female wage and salary earners (excluding rural industry and private domestic service) expanded quickly until mid-1943 and reached its highest level in December, 1943. A downward trend became noticeable in the first half of 1945. From August, 1945, to January, 1946, there was a decrease of 28,800, Government employment decreasing by 19,800 and private employment by 9,000.

Only a small proportion of discharged Servicewomen express an intention to enter civilian employment.

The downward trend in governmental munitions, aircraft and shipbuilding establishments (see definition note (a) Table 5) is shown below:-

<u>TOTAL PERSONS:</u> (d)	1,952.3	1,904.3	1,904.5	1,919.9	1,893.1	1,941.0

(a) Includes Government munitions and aircraft, etc. establishments, annexes and a few private firms engaged exclusively on munitions, aircraft and shipbuilding, but excludes private factories engaged partly on war contracts and partly on other work.

(b) Until end of 1945 figures refer to Allied Works Council.

(c) Includes Building and Works Construction (other than Commonwealth Works projects), Education, Health, Professional, Hotels, etc. and for females also Mining and Forestry, etc. which are shown separately for males and persons.

(d) Total males and total persons shown above for 1944 and later may exclude some wage and salary earners employed on smaller buildings (houses, etc.) and in alterations and repairs to buildings. The Bureau of Census and Statistics has commenced a comprehensive collection covering Building Operations which will provide information on employment on building operations other than repairs, painting, etc.

(e) Revised since last issue.

The movement of employment in Australia in the main industrial groups from December, 1945 to January, 1946 is summarised from Table 5 as follows:-

In respect of males the principal increases were:- Factories (excluding Governmental Munitions, etc.) +35,500; Wholesale Trade, etc. +4,000; Communication and Road Transport, +2,400; Mining and Quarrying, +1,500; Banks and Insurance, +1,700; Retail Trade, +1,300; Shipping and Stevedoring, +1,000; Other Industries (Professional and Personal Service and Building and Construction, excluding Commonwealth Works) +7,300.

Decreases in male employment occurred in Governmental Munitions, etc. -700 and Commonwealth Works, -700.

In respect of females, increases occurred in Other Factories +800; Other Industries (Professional and Personal Service, etc.) +600; Rail and Air Transport +200; Wholesale Trade, etc. +200. Decreases occurred in Governmental Munitions, etc. -600; Road Transport and Communication -400; Banks and Insurance -300; Retail Trade (seasonal) -6,400; Governmental -900.

SECTION C. STATES : TOTAL EMPLOYMENT.

Estimated numbers in employment at the end of January, 1946 exceeded December estimates in all States. In each State the number of males in employment increased while the number of females in employment decreased.

See Notes (a), (b), (c) and (d) to Table 5

Note: Figures published in Table 7 in Employment Bulletin No. 50 have been revised in respect of New South Wales and Australia as follows:- Rail and Air Transport -2,000 males; Other Industries +2,000 males.

The preceding statistics relating to total employment are based on data from various sources including Pay-Roll Tax returns and returns of Commonwealth Government employment.

PART III

REHABILITATION STATISTICS (DISCHARGES FROM THE FORCES)

The following statistics have been derived from tabulations of Demobilisation Form 1(a). The forms show personal particulars of men and women discharged from the Forces. The month of discharge, for the purpose of these tabulations, is the month during which the discharged person was able to resume civil life, irrespective of the fact that he or she may be entitled to a period of accrued service leave.

The first table shows that in August, 1945, there was a sharp rise in the number of men discharged due to the operation of the long service and other special discharges programme. Nearly twice as many as in August were discharged in September. General demobilisation commenced on 1st October and 41,231 men and 2,961 women were discharged during that month. The numbers increased to a peak of 76,527 (men 72,234; women 4,293) in January 1946 and fell to 50,727 in February.

Total numbers in Australia's Forces at end of September, 1945, when general demobilisation was about to commence are given below:-

	<u>MALES</u>	<u>FEMALES</u>	<u>SOURCE</u>
Army ..	376,323	22,752	(Census Office)
Navy ..	36,247	2,571	(Dept. of Navy)
Air Force ..	147,937	16,762	(Dept. of Air)
Total:	560,507	42,085	

(Figures above represent gross enlistments less discharges and deaths. They include prisoners of war not recovered and missing, some of whom are subsequently reported, or presumed, dead).

TABLE 8. MALES - DISCHARGED IN EACH STATE - ALL SERVICES.
(Demob.1(a) Forms are completed by all Service personnel on discharge)

Month	N.S.W. (incl. A.C.T.)	VIC.	QLD.	S.A. (incl. N.T.)	W.A.	TAS.	AUSTRALIA
1945:							
May ..	2,185	1,585	952	606	588	199	6,115
June ..	2,239	1,948	863	646	533	210	6,439
July ..	2,777	2,374	963	714	744	237	7,809
August ..	5,038	4,048	1,541	1,098	1,241	347	13,313

December(a) ..	18,787	15,043	8,003	3,699	5,206	2,122	52,860
1946:							
January (a) ..	27,546	18,187	10,057	6,402	8,010	2,032	72,234
February(b) ..	15,497	14,921	6,344	4,266	4,183	1,271	46,482

(a) Total discharges shown for some States for months October-December, 1945 inclusive are slightly understated. Most of the deficiency has been taken into account in January figures.

(b) Subject to revision.

The total numbers of females discharged during recent months were as follows:-

July 1945, 974; August 1,205; September 1,729; October 2,961; November 3,942; December 3,410; January 1946, 4,293; February 4,245 (approx.).

The following table shows the principal industries in which persons discharged during December 1945 were placed. "Placements" include (i) persons returning to their own businesses or farms or setting up in business or farming; (ii) persons returning to their pre-service employment including resumption of apprenticeship; (iii) persons who had accepted employment other than with their pre-service employer: they refer to first placements after discharge which were made within two weeks of the end of the month of discharge. "Placed" means future employment or business enterprise arranged within this period but the actual date of commencing work may be some weeks later and, in most cases, seems to be from two to three months later. Most of the men classified as "placement not stated or deferred" subsequently enter paid employment. Women retiring from gainful occupation in general undertake unpaid home duties.

TOTAL DISCHARGES:	18,787	15,043	8,003	3,699	5,206	2,122	52,860	3,410

(a) Including Gas, Water and Electricity Supply for which total placements for December were 810 males.

(b) See Notes preceding this Table.

Placements of men released during December on Occupational grounds totalled 5,189. All other discharges (males) numbered 47,671.

Placements of Occupational discharges (males) included 1,085 for building; 119 for other construction; 1,039 for rural industry; 187 for other primary industry; 381 for transport and communication; 1,507 for factories (mainly building materials, clothing, food and engineering); and 871 for other industries.

P A R T IV

WAGES PAID

Table 10 sets out the estimated aggregate weekly wages paid to all persons in civil employment (including rural and private domestic) for each State and by quarters for the years 1941-42 to 1945-46. Of the total wages paid in the Commonwealth, approximately four-fifths is recorded in Pay Roll Tax Returns and the remainder is estimated.

TABLE 10. TOTAL WAGES PAID - WEEKLY AVERAGE
(Subject to revision)

Weekly Average during Quarter ended -	N.S.W. & A.C.T.	VIC.	QLD.	S.A. & N.T.	W.A.	TAS.	AUSTRALIA

March ..	4,584	3,131	1,559	935	593	306	11,108
June ..	4,726	3,222	1,589	972	614	313	11,436
1944-45:							
September ..	4,590	3,135	1,549	962	599	312	11,147
December ..	4,766	3,260	1,553	964	629	306	11,478
March ..	4,551	3,703	1,414	913	619	303	10,873
June ..	4,783	3,223	1,540	911	632	321	11,410
1945-46:							
September ..	4,735	3,183	1,514	932	643	325	11,332
December ..	4,808	3,320	1,555	896	654	322	11,555

Apart from seasonal fluctuations (the weekly averages for December and June quarters are high relatively to the September and March quarters), the underlying trend of total wages paid has been upward until the December quarter 1943-44, and, from the March quarter 1943-44 to the December quarter 1944-45, downward. The March quarter 1944-45 declined relatively to the December quarter rather less than in the preceding year and the June quarter increased relatively to the March quarter rather more than in the preceding year so that the trend of total wages paid appears to have turned slightly upward again from the March quarter, 1944-45. Further evidence of the rising trend is provided by the figures for the September quarter of 1945-46 which are higher than those of the corresponding quarter during each of the previous four years. December quarter figures were affected slightly by industrial disputes and short-time due to power rationing, etc.

/Average

Average weekly earnings per "male unit" are set out below. Total civil employment expressed in male units is derived by adding to total male employment 45% of total female employment.

TABLE 11. STATES - AVERAGE WEEKLY EARNINGS PER MALE UNIT.

(Subject to revision)

December ..	6.91	6.91	6.43	5.92	6.29	5.66	6.68

Average weekly earnings reached their maximum in 1943-44 and have shown some decline since then.

P A R T V.

PAY-ROLL TAX RETURNS

A summary statement of employment recorded on Pay-Roll Tax returns for Australia is given without any adjustment in the next table.

The returns do not cover employees of the Commonwealth Government; employers who pay not more than £20 per week in wages do not make returns and religious and public benevolent institutions and hospitals are also exempt. The proportion of all employees who are included varies from State to State, but for Australia as a whole, the proportion of employees (other than those of the Commonwealth, those engaged in rural industries and female domestics in private households) in the Pay-Roll Tax returns is 90 per cent. of the estimated total of males in employment and about 75 per cent. of the females.

Employers' Pay-Roll Tax returns were classified for "industry" according to the industries in which the firms were predominantly engaged.

The Table may be taken as indicating trends from month to month, but not as a guide to the absolute numbers employed in the respective industries.
